Adobe RGB Profile

Question: DiCentra says that the Adobe RGB (1998) profile needs to be installed on my machine. How do I do it?

Answer: You need to download the profile from the Adobe web site and then install it as described below.

1. In your browser go to
https://www.adobe.com/support/downloads/iccprofiles/icc_eula_win_end.html
2. Click on the **Accept** button at the bottom of the page if you agree with Adobe's terms.
3. Click on **Proceed to Download** on the next page
4. Click on **Download Now** on the next page
5. Save the download zip file to your desktop or somewhere convenient.
6. Unzip the file using **right-click > Extract All**
7. Open the **unzipped folder** and open the folder **Adobe ICC Profiles (end user)** inside it.
8. Open the **RGB** folder.
9. You will see the file **AdobeRGB1998.icc** inside it.
10. **Right-click** on it and then select **Install Profile**.
11. The Adobe RGB (1998) colour profile is now installed.
12. You can delete the downloaded zip file and the unzipped folder as they are no longer needed.
